

## Our Mission

---

To be a reliable, technically advanced, customer oriented supplier of fertile hatching eggs; adding value to our customers through continuous focus on health, genetics, storage, shipping and delivery.

## Fertile Hatching Eggs

---

Fertile hatching eggs from broiler breeders with genetically superior blood lines, grown under the strictest bio-security, health, and disease prevention guidelines.

## Tunnel Ventilated Houses

---

Controlling the in-house environment for best bird performance is a key to success in poultry production. Producers who do ventilation right get better feed efficiency, better growth rate, lower mortality, and better returns from their flocks.

We believe business should be fun,  
profitable and personally rewarding!

# Hatching Your Future

## Animal Feed Ingredients and Premixes

---

Wincorp is a global distributor of animal feed ingredients such as premixes, oats, and custom blended feed fats.
